	Notice of Billing Requirement – eMaint Work Orders and Surface Maintenance Tasks	Version 2.0 March 20th, 2024

March 20, 2024

**Attention Vendors
Notice of Billing Requirement
eMaint Work Orders**

Dear Valued Supplier:

Effective March 23, 2020, California Resources Corporation (CRC) will require an eMaint Work Order for ALL invoices that carry a Surface Maintenance task. CRC’s billing portal, iSupplier, will automatically reject the invoice(s) if the work order is missing for any Surface Maintenance task. An eMaint work order consists of up to (6) numerical characters:

XXXXXX

At the time work is scheduled, CRC field reps provide the eMaint work orders to vendors along with the project and task. To further assist in identifying Surface Maintenance tasks that will require an eMaint work order, please review the attached “Surface Maintenance Task” list.

We look forward to your continuing support as CRC streamlines its billing process.

Please communicate questions directly to your CRC Supply Chain representative. For issues regarding any work order rejections, please contact CRCN.EAMS@crc.com.

Thank you,

California Resources Corporation
